

## Press release

### **SEFE and biogeen announce agreement for sale of SEFE Mobility**

- **SEFE to sell its entire stake in SEFE Mobility to biogeen**
- **Divestment helps SEFE to streamline its portfolio and meet EU regulatory requirements**
- **Acquisition supports biogeen's sustainable mobility ambitions**

[Berlin, Germany; 26 November 2025] – SEFE Securing Energy for Europe has signed a share purchase agreement with biogeen GmbH for the divestment of its subsidiary, SEFE Mobility GmbH. The transaction will be completed once all customary approvals have been obtained.

SEFE Mobility, headquartered in Berlin, operates more than 50 renewable biofuel filling stations across Germany and the Czech Republic. The company employs eight people and generated approximately €12 million in annual turnover in 2024. biogeen is one of Germany's leading biomethane producers and operates state-of-the-art biogas plants that produce climate-friendly, locally sourced and reliable energy. biogeen is a portfolio company of Partners Group, a leading global player in private markets.

For SEFE, the divestment reflects a deliberate step towards sharpening its strategic focus and streamlining its portfolio. In addition, the sale of SEFE Mobility also meets conditions imposed by the European Commission for approving SEFE's 2022 recapitalisation by the Federal Republic of Germany.

For biogeen, the acquisition represents a targeted expansion into complementary downstream activities, reinforcing its broader growth strategy. SEFE Mobility's established market position and experienced team provide a strong foundation for further growth.

Dr Christian Ohlms, CFO of SEFE: "With biogeen, we have found a buyer whose vision for sustainable energy is fully aligned with SEFE Mobility's strategic direction. This agreement creates a strong foundation for accelerating growth in low-emission transport solutions."

Jörg Selbach-Röntgen, CEO of biogeen: "Integrating SEFE Mobility into our operations enables us to unlock significant growth potential in the mobility sector. This step brings us closer to becoming a fully integrated provider of innovative, customer-focused solutions for green molecules across all business areas."

Andreas Gaun, CFO of biogeen, added: "SEFE Mobility is a perfect fit for our long-term strategy, and we are committed to leveraging the complementary strengths of both organisations. We are excited to collaborate with a team that is so experienced and skilled in this field."

## About SEFE

SEFE, an international energy company, ensures the security of supply and drives the decarbonisation of its customers. SEFE's activities span the energy value chain, from origination and trading to sales, transport and storage. Through its decades-long expertise in trading and the development of its LNG business, SEFE has become one of the most important suppliers to industrial customers in Europe, with an annual sales volume of 200 TWh of gas and power. Its 50,000 customers range from small businesses to municipalities and multinational organisations. By investing in clean energies and especially in the hydrogen ecosystem, SEFE is contributing to the energy transition. The company employs around 2,000 people globally and is owned by the Federal Government of Germany.

Securing energy – now and for the future.
