SEFE signs supply agreement with Canada's Ksi Lisims LNG

- **First supply agreement with Canadian partner**
- **1 million tonnes of LNG per year for 20 years**
- **Destination flexibility enables SEFE to optimise global portfolio**

[Berlin, Germany; 26 October 2026] – Following the signing of a Heads of Agreement earlier this year, SEFE Securing Energy for Europe has entered into a long-term LNG supply agreement with Canada's Ksi Lisims LNG. Under the agreement, SEFE will purchase one million tonnes per annum (mtpa) of liquefied natural gas (LNG) on a free-on-board (FOB) basis for 20 years, with deliveries expected to commence in the early 2030s.

The agreement marks SEFE's first supply partnership with Canada and further expands the company's diversified global LNG portfolio. The destination-flexible volumes will strengthen SEFE's ability to serve customers across international markets while contributing to energy security and supply resilience.

Ksi Lisims LNG is being developed by Western LNG, Rockies LNG and the Nisga'a Nation as a low-emission LNG export venture that combines Canada's abundant gas resources with renewable hydro power. In addition, the partnership with the Nisga'a Nation ensures long-term economic opportunities for local communities and reflects a collaborative approach to developing major energy infrastructure.

Frédéric Barnaud, SEFE CCO, said: "This agreement is an important step in further diversifying SEFE's global LNG portfolio and securing reliable long-term energy supplies for our customers. Together with Ksi Lisims LNG, we will help strengthen energy security while advancing the transition to a more sustainable energy future."

Davis Thames, Western LNG Founder, President and CEO, said: "We look forward to working with SEFE to provide its customers with reliable, low-carbon LNG. Secure and diversified energy supply is fundamental to global economic prosperity, and our project is uniquely positioned to meet these priorities. The momentum behind Ksi Lisims LNG is stronger today than at any point in its development and we are excited about the months to come."

About SEFE

SEFE is an international energy company anchored in Europe, delivering energy solutions that ensure reliable and affordable supply. Our activities span the entire energy value chain – from origination and trading to sales, transport and storage. With decades of trading expertise and a growing LNG portfolio, SEFE is one of Europe's leading suppliers to industrial customers, providing more than 200 TWh of gas and power each year. We supply over 50,000 clients,

from small businesses to municipalities and multinational organisations. By investing in clean energies, we support our customers on their decarbonisation journey and contribute to the energy transition. SEFE employs over 2,000 people worldwide and is owned by the Federal Government of Germany.

Securing energy – now and for the future.
